EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest time information representative of a singing-starting time point, and singing length information representative of a singing length that is earlier in time than the singing-starting time point. (See Specification, e.g. Figures 9, 20, and 27A to 27C) Applicants' Specification, Page 2, suggests an advantage of making more natural singing voices by setting the singing-starting time point of a consonant (first phoneme) to be set earlier than the actual singing-starting time point.

The Official Action of the Japanese Patent Office, dated 29 November 2005, rejecting claims 1 to 4 and 11 over cited references JP-A-10-319993 and JP-A-8-248993 was considered, but it is maintained that claims 1 to 4, 11, and 13 are allowable. The Japanese Official Action states that the references teach adjusting the start time of vowel sound as a vocal consonant is hard for people to hear, and adjustment of sounding start timing of a CV voice fragment. However, there is no evidence that the references teach inputting time information representative of a singing-starting time point earlier than a singing-starting time point. At best, the references may suggest that it is advantageous to adjust a start time, but there is no

suggestion of providing time information for making a start time earlier. Thus, independent claims 1, 3, 11, and 13 are allowable because the prior art of record does not disclose or suggest providing time information for making a singing-starting time point earlier in time for a first phoneme so as to make more natural singing voices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
